Listing of Claims

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Previously presented) A method comprising: detecting that a telephone set has been connected to a telephone line; and in response to the detection:

identifying the telephone line to which the telephone set has been connected; retrieving a speed dial list from the database based on the identifying, wherein the speed dial list is associated in the database with the telephone line; and communicating the speed dial list associated with the telephone line to the telephone set.

- 2. (Original) The method of claim 1 wherein the detecting comprises receiving a telephone call automatically placed by the telephone set via the telephone line in response to the telephone set being connected to the telephone line.
- 3. (Previously presented) The method of claim 2, wherein the telephone line to which the telephone set has been connected is identified based on at least one of a calling party number and an automatic number identification associated with the telephone call.
- 4. (Original) The method of claim 2 wherein the communicating is performed within the telephone call.
 - 5. (Original) The method of claim 2 further comprising: providing, within the telephone call, an option to download the speed dial list; and receiving, within the telephone call, a selection of the option.
 - 6. (Original) The method of claim 1 further comprising: storing the speed dial list in the telephone set.

7. (Previously presented) A method comprising:

receiving a telephone call automatically placed by a telephone set via a telephone line in response to the telephone set being connected to the telephone line; providing within the telephone call an option to down load a speed dial list; receiving, within the telephone call, a selection of the option to download the speed dial

communicating the speed dial list to the telephone set; and

storing the speed dial list in the telephone set.

8. (Previously presented) A system comprising:

a processor to:

list;

detect that a telephone set has been connected to a telephone line; and in response to the detection:

> identify the telephone line to which the telephone set has been connected; retrieve a speed dial list from a database based on the identifying, wherein the speed dial list is associated in the database with the telephone line; and

communicate the speed dial list associated with the telephone line to the telephone set.

- 9. (Original) The system of claim 8 wherein the processor is to detect that the telephone set has been connected to the telephone line by receiving a telephone call automatically placed by the telephone set via the telephone line in response to the telephone set being connected to the telephone line.
- 10. (Previously presented) The system of claim 9 wherein the processor identifies the telephone line to which the telephone set has been connected based on at least one of a calling party number and an automatic number identification associated with the telephone call.

11. (Original) The system of claim 9 wherein the processor is to communicate the speed dial list within the telephone call.

- 12. (Original) The system of claim 9 wherein the processor is further to provide, within the telephone call, an option to download the speed dial list, and to receive, within the telephone call, a selection of the option.
- 13. (Previously presented) A computer-readable medium having computer-readable content to cause a computer to perform acts of:

detecting that a telephone set has been connected to a telephone line; and in response to the detection:

identifying the telephone line to which the telephone set has been connected; retrieving a speed dial list from a database based on the identifying, wherein the speed dial list is associated in the database with the telephone line; and communicating the speed dial list associated with the telephone line to the telephone set.

- 14. (Original) The computer-readable medium of claim 13 wherein the detecting comprises receiving a telephone call automatically placed by the telephone set via the telephone line in response to the telephone set being connected to the telephone line.
- 15. (Previously presented) The computer-readable medium of claim 14 wherein the telephone line to which the telephone set has been connected is identified based on at least one of a calling party number and an automatic number identification associated with the telephone call.
- 16. (Original) The computer-readable medium of claim 14 wherein the communicating is performed within the telephone call.
- 17. (Original) The computer-readable medium of claim 14 wherein the computer-readable content further causes the computer to perform acts of:
